Prodigal Swan Rentals

Fuel and fuel line is enclosed in a fully sealed, steel-plated neck piece.

DESIGN
The Prodigal Swan is built on a 1966 Taylor-Dunn electric cargo mover, made from hand-cut, hand-welded sheet metal and structural steel. Sitting atop of the swan's head is a crown that produces flame effects. The wings are adorned with 1000 modules of LED lights that are programmable to display a variety of psychedelic light shows. You will also find two Peavey/JBL self-powered 15 inch speakers within the cargo area. The Prodigal Swan is capable of hosting up to 10 passengers.

DIMENSIONS
6 ft. wide x 16 ft. long x 12 ft. tall w/ crown

DESIGN SAFETY
The base vehicle is a 1996 electric Taylor Dunn B248 cargo mover. The load capacity is 4000 lbs. and we have thoroughly tested the speed control and braking systems. The ovoid steel cage will protect people form falling out, but the exit through the rear is completely open and low to the ground making exiting safe/easy. The electrical system has been designed/tested by an electrical engineer.

RENTAL
$5,000 per 6 hour event
**Rental includes fire operator and propane*
